

The diagram consists of two rectangular boxes. The top box is divided into two equal halves by a vertical line. The left half contains one black circle at the bottom-left and another at the top-center. The right half contains three black circles arranged in a triangle: one at the top, one at the middle, and one at the bottom-right. The bottom box is a single rectangle containing four horizontal lines. The first and third lines from the top each have a '+' sign in their center. The second and fourth lines each have an '=' sign in their center.

The diagram consists of two rectangular boxes stacked vertically. The top box is divided into two equal halves by a vertical line. The left half contains one black dot at the bottom left and another at the top center. The right half contains three black dots arranged in a triangle: one at the top center and two below it, one to the left and one to the right. The bottom box contains four horizontal lines. The first and second lines from the top each have a '+' sign in their middle third. The third and fourth lines each have an '=' sign in their middle third. All lines are thin and black.

The figure consists of four parts arranged in a 2x2 grid. The top-left box contains two black dots. The top-right box contains four black dots. The bottom row contains two groups of three horizontal minus signs each, separated by a plus sign in the center.

The figure consists of two square boxes. The left box contains three black dots arranged in a triangle. The right box contains four black dots arranged in a diamond shape. Below these boxes is a horizontal line. Underneath the line, there are two rows of symbols: a minus sign, a plus sign, another minus sign, an equals sign, and a final minus sign.

Two dice are shown, each with four dots arranged in a square pattern. The first die has dots in the top-left, top-right, bottom-left, and bottom-right positions. The second die has dots in the top-left, top-right, middle-left, and middle-right positions.

A worksheet featuring two large, hollow dice. The left die has two black dots on its top face. The right die has five black dots on its top face. Below each die are four horizontal lines for writing numbers and symbols.

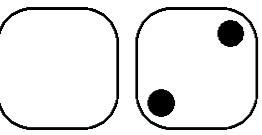

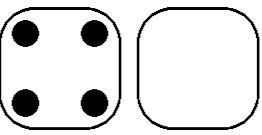

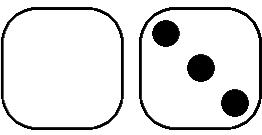

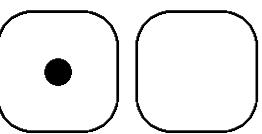

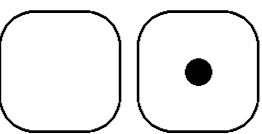

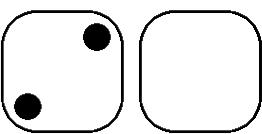

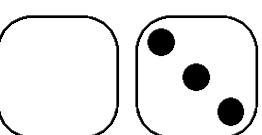

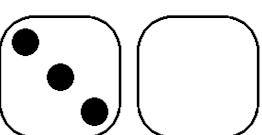

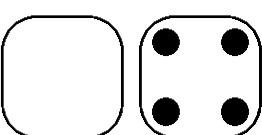

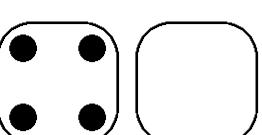

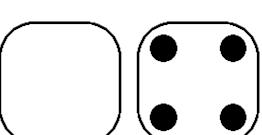

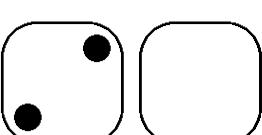

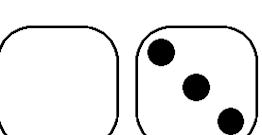

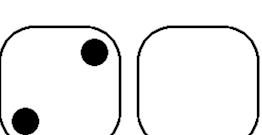

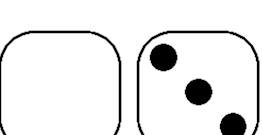

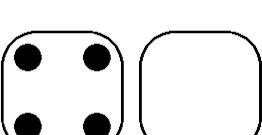

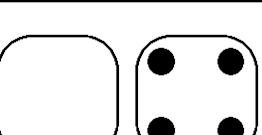

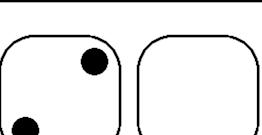

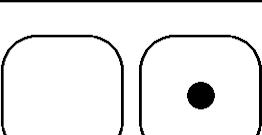

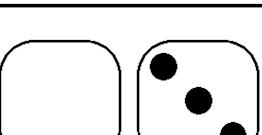

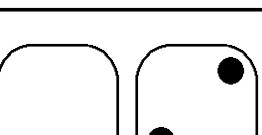

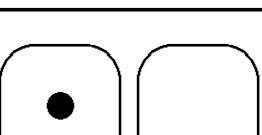

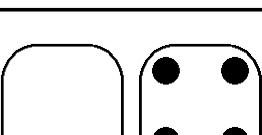

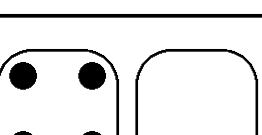

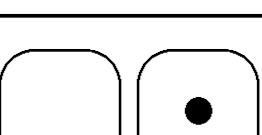

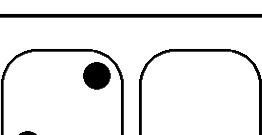

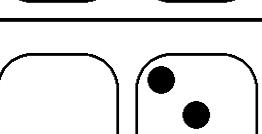

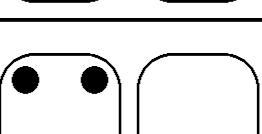

The image shows two dice. The left die has four dots arranged in a 2x2 square pattern. The right die has three dots arranged in a triangle pattern (one at the top, two below it).

The image shows two dice. The left die has four dots arranged in a square pattern. The right die has three dots arranged in a triangular pattern.

A worksheet featuring two large, hollow dice at the top. The left die has five black dots arranged in two columns: one dot in the top row and four in the bottom row. The right die has four black dots arranged in two columns: two in the top row and two in the bottom row. Below the dice are four sets of horizontal lines for writing numbers and symbols, followed by an equals sign and another set of lines for the answer.

Two dice are shown at the top. The left die has two dots on its top face and one dot on its side face. The right die has three dots on its top face and two dots on its side face. Below the dice are four sets of blank horizontal lines for writing numbers, separated by plus signs (+) and minus signs (-), followed by an equals sign (=).

_____ + _____ = _____
_____ + _____ = _____
_____ - _____ = _____
_____ - _____ = _____
