

Ziffern-Schreibkurs Mathematik Klasse 1

Der nachfolgende Ziffernschreibkurs wurde wie dargestellt in einer ersten Klasse eingesetzt. Vorausgehend kamen Spur- und Schwungübungen zu den Arbeitsblättern zum Einsatz, die hier nicht enthalten sind, sich jedoch in vielen Grundschulwerken finden.

Die Veröffentlichung hat aber einen Haken. Die ursprünglich eingesetzte Schulschrift unter einer Schullizenz erlaubt keine Veröffentlichung im Internet und kann deshalb aus besagten juristischen Gründen nicht verwendet werden. Also was tun? Für die nachfolgenden Schreibblätter wurde deshalb eine sogenannte OpenSource-Schrift unter der OFL-Lizenz (SIL Open Font License) verwendet. Die Schrift ist vielfach im Netz zu finden. Geben Sie in der Google-Suchmaske 'Comic Relief Jeff Davis' ein, um auf eine der Downloadseiten zu gelangen.

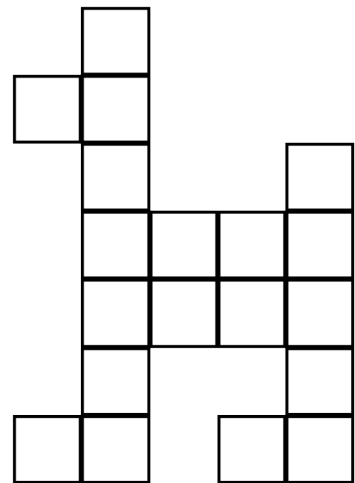

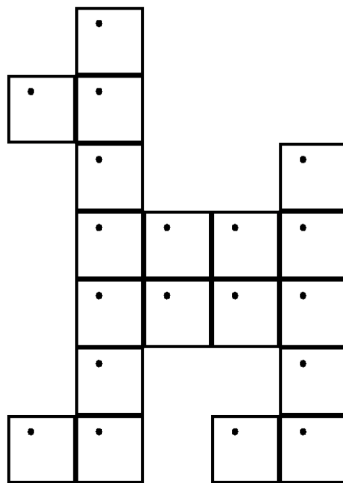

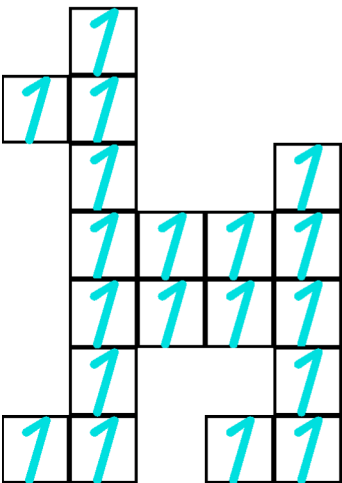

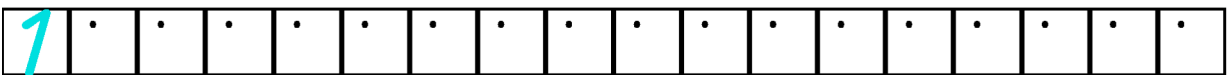

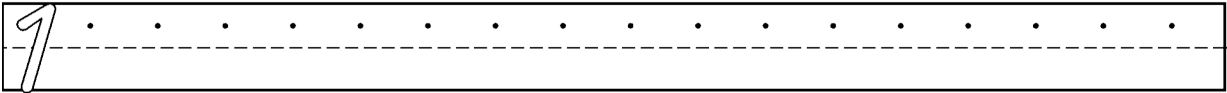

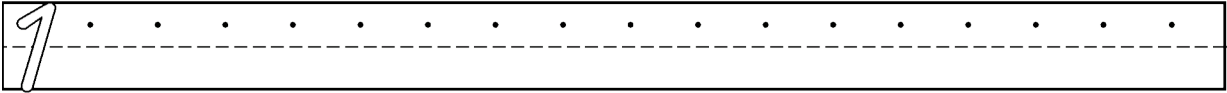

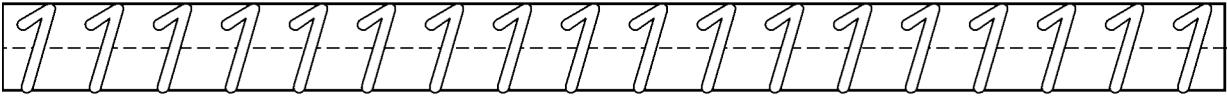

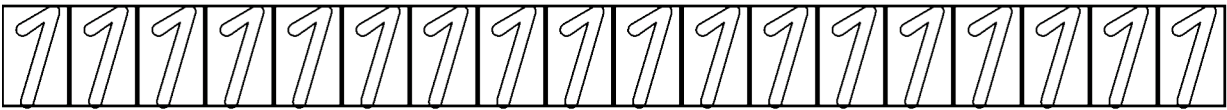

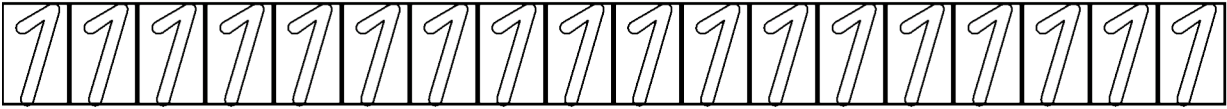

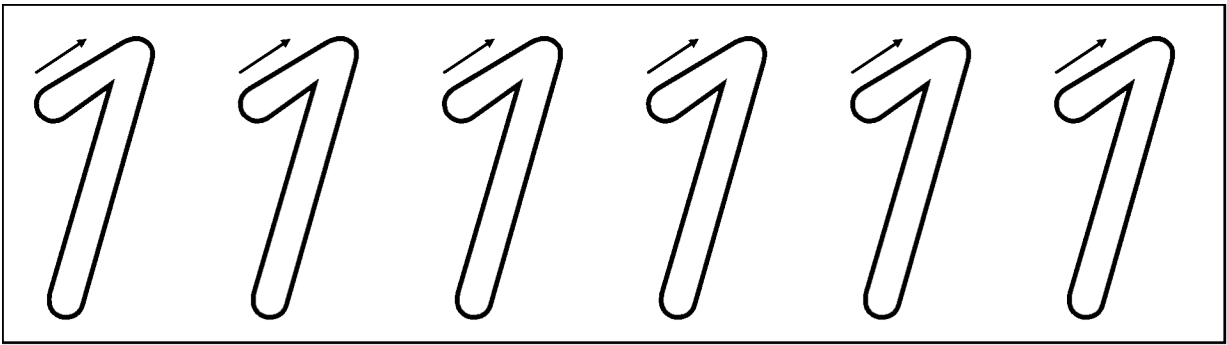

Diese Schriften weichen aber vielfach von den Lizenzschriften für Schulen ab, es finden sich also immer auch andersförmige Buchstaben innerhalb der Schrift. So ist es auch bei der Schrift von Jeff Davis.

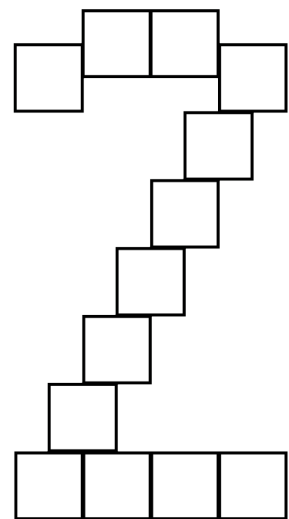

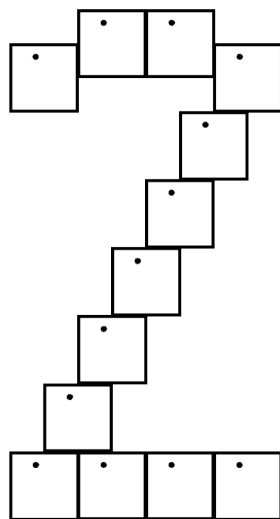

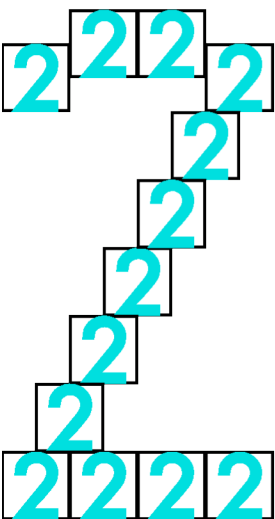

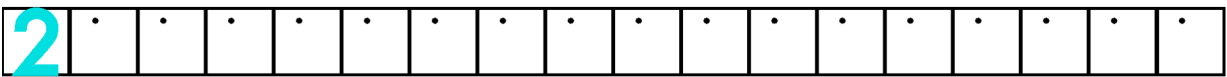

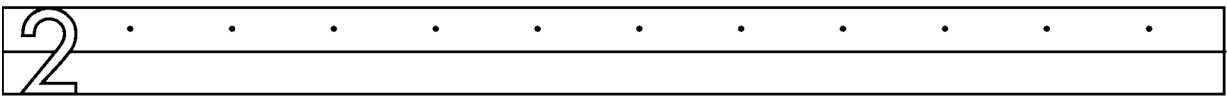

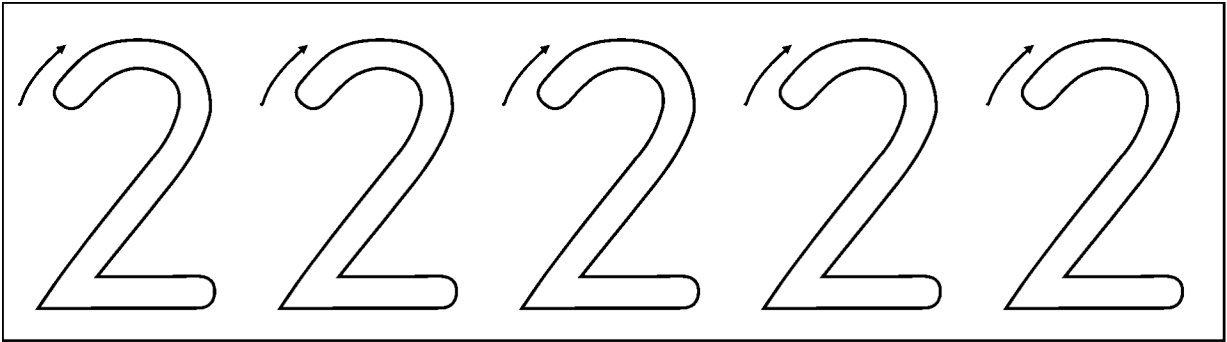

Die OFL-Lizenz erlaubt aber das Modifizieren der Schrift. Das wurde hier ausgenutzt, um die Abweichungen so gering wie möglich zu halten und für die Grundschule zu modifizieren. So wurde die 4 oben geöffnet und die 7 erhielt einen Querstrich. Die Schrift kommt also dem Original recht nahe, ist jedoch wie schon erwähnt mit dem Original nicht identisch. Wenn Sie mit diesen kleinen Abweichungen leben können, dann sind die nachfolgenden Arbeitsblätter sicherlich eine Erleichterung für den Schulalltag.

Beschreibung Comic Relief is a typeface designed to be metrically equivalent to the popular Comic Sans MS. Comic Relief can be used in place of Comic Sans MS without having to move, resize, or reset any part of the copy. Comic Relief is freely available via loudifier.com/comic-relief as a .ttf, FontForge .sfd project, and as a web-ready @font-face kit. It is copylefted using the SIL Open Font License, so feel free to use it, modify it, or embed it as you see fit.
